DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 5 – 8, 14, 21 and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to systems for muting wireless communication devices and, more particularly, to a system for automatically muting a wireless communication device when the device enters a defined silent zone, and for automatically communicating muting status information to other devices attempting to communicate with the muted wireless communication device.

Applicant's independent claim 1 recites, *inter alia*, a wireless communication device of a silent zone system with a structure as defined in the specification (pages 5 – 10) including a transceiver configured to receive a mute command and a muting status information in response to the wireless communication device entering a silent zone; a programmable memory for storing device data associated with the wireless communication device; and a processor configured to activate a silent mode of the wireless communication device in response to the mute command and provide notification of a status of the wireless communication device through an advisory message to another device attempting to communicate with the wireless communication device, wherein the advisory message includes the muting status information received by the transceiver and the device data stored by the programmable memory. Applicant's independent claim 1 comprises a particular combination of element, which is neither taught nor suggested by the prior art.

Art Unit: 2617

Accordingly, applicant's claims are allowed for these reasons and for the reasons recited by applicant' in amendment filed 3/2/2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
